Recommendations to Individual Pubs

It makes no difference if the publication is on paper, CD-ROM, or the web. The steps for submitting your comments on individual pubs are just about the same.

● Tear out the paper DA Form 2028 from the back of the book. Or you can print a hard copy from the electronic version. If your publication doesn't have a 2028, you can get the form from one of the following places:

- U.S. Army Publishing Agency (USAPA) web site
- EM 0001, the Army Electronic Library
- FormFlow software

FILL IT OUT. MAKE SURE YOU INCLUDE THE FOLLOWING...

- Your name
- Your unit's complete address
- DSN and commercial phone numbers
- Fax numbers
- Date sent
- Publication number
- Change number
- Publication date
- Publication title
- Page
- Paragraph

Then write down your comments. Describe the problem and how to fix it. Be sure to include any information that helps identify the item or the problem, things like figures, tables, lines, NSNs, or references.

● Send it to the publication's proponent. You can mail it or fax it. You'll find regular mail addresses and fax numbers in the paragraph titled *Reporting Errors and Recommending Improvements*. In TMs, that's on the title page.

● If you prefer, you can e-mail your comments. Include all the information that goes on a DA Form 2028.

Interactive Electronic Technical Manuals (IETM) on CD-ROM

Submit your comments about IETMs on CD-ROM the same way you would comments about individual publications. It makes no difference if the IETM contains errors in information or a problem with the CD itself. All comments and recommendations go to the IETM's proponent. They're listed above.

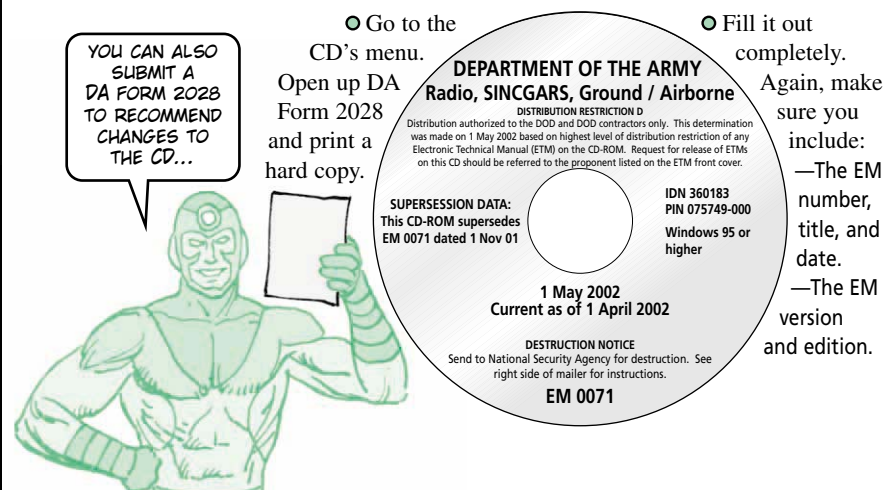

CD-ROMs Containing Electronic Technical Manuals

These days a lot of people are using publications on CD-ROM containing electronic technical manuals (ETMs). What if you have a problem with the CD itself? For example:

- Something wrong with the CD's operation or the PC setup.
- Publications that should be added or deleted to support a system or commodity.
- A pub that's not properly linked.
- A pub that won't open.

If you find these kinds of errors, submit your recommendations to the USAMC Logistics Support Activity (LOGSA). LOGSA prefers you send your comments by e-mail. Do it like this:

- Go to the CD's menu. Open up *DA Form 2028 Recommended Changes to Publications*. You'll find instructions on submitting your comments by e-mail. Record all the information you normally would on a DA Form 2028, including:
 - The EM number, title, and date. This information is found on the CD-ROM label.
 - The EM version and edition. Also found on the label, this information refers to the computer operating software that reads the CD, for example, Windows 95 or higher.
- Then e-mail your comments to: logetm@logsa.redstone.army.mil

- Send in the 2028 by mail or fax:

Mail: Commander
